Question #	CLO #	Domain and BT Level	Total Marks
1	1,2	C1,C2	10

Objective: Design and develop a responsive restaurant website using Bootstrap, JavaScript, jQuery, HTML, and CSS.

Question 1: Build a **Restaurant Website** that fulfills the following requirements:

1. Create a **Homepage** that includes:
 - A responsive Bootstrap **Navbar** with links (*Home, Menu, Order, Contact*).
 - A Bootstrap **Carousel** with at least 3 food images.
 - A short **Welcome Section** introducing the restaurant.
2. Create a **Menu Page** that displays at least 6 food items using **Bootstrap Grid and Cards**.
 - Each card must contain: Image, Title, Description, Price, and an **"Order Now"** button.
3. Develop an **Order Form** with the following fields:
 - Name, Email, Phone, Food Item (Dropdown), Quantity
 - Apply **JavaScript Validation**.

4. Display a confirmation message (alert or modal) when the form is successfully submitted.
5. Add at least **two jQuery features**, such as:
 - a. Show/Hide menu categories (*Starters, Main Course, Desserts*).
 - b. Smooth scrolling for navbar links.
 - c. Toggle between light and dark themes.
6. Use at least **two additional Bootstrap components** besides the carousel (like.. Modal, Accordion, Alerts, Badges, Buttons).
7. Add a **Footer** containing restaurant contact details (email, phone, address) and social media icons (Bootstrap Icons or FontAwesome).

“GOOD LUCK”
